

## Progressions Report for Tiger Woods For 1 Year Starting 1/1/2008

### Introduction

Secondary progressions represent a symbolic movement of the planets and cusps of the birth chart. This progressed motion is based on the idea that naturally occurring cycles (e.g., days, weeks, months, years) can be compared proportionally. In secondary progressions, each day after (or before) birth corresponds to one year in the life. For example, if someone were born on October 5, 1960, then their progressed chart at age 19 would correspond to a chart cast for 19 days after birth, that is, for October 24, 1960. When we measure backward in time before the birth chart, we speak of converse secondary progressions.

When interpreting secondary progressions, we compare the positions of the planets and other horoscope factors for a particular time after birth with their locations in the birth chart. Certain angular separations, called aspects, have special significance. The most important progressed aspects are those formed by angular separations of 0 (conjunction), 30 (semi-sextile), 45 (semi-square), 60 (sextile), 90 (square), 120 (trine), 135 (sesquiquadrate), and 180 (opposition) degrees. The aspects involving 30, 60, and 120 degrees are considered harmonious and easy; they represent luck and opportunity. The aspects involving 45, 90, and 180 degrees are considered inharmonious and stressful; they signify challenges that force up to grow and develop. If their energy is used unwisely, they confront us with crises and difficulties that get our attention and help us get back on track.

The aspects formed by the secondary progressed planets and cusps among themselves and with the natal placements indicate the unfolding of major life trends. The progressions act like the unfolding of the "genetic code" of the birth chart and form the backdrop against which the transits (the current actual movement of the planets) for a given period take place.

When reading this report, pay special attention to the following factors:

- 1) The house and sign placement of the progressed Moon. These influences last for about a 2 1/3 year period and strongly influence one's life during that time.
- 2) The aspects formed by the progressed MC, ASC, Sun, and the planets (other than the Moon). These will indicate major trends for a year or more surrounding the date on which they become exact.
- 3) The aspects formed by the progressed Moon. These are briefer influences that will color a several week period either side of the date on which they occur. These

## Progressions Report for Tiger Woods For 1 Year Starting 1/1/2008

progressed Moon aspects can also act as "triggers" that stir the aspects formed by the other planets to manifest themselves. Aspects formed by transiting planets to progressed positions can act as triggers in a similar manner.

4. Of less importance are the house and sign placements of the progressed Sun and planets other than the Moon. For the slower planets the progressed placements will be the same as the birth placements for much or all of the life cycle. Thus, they will have a similar meaning to their occurrence in the natal chart. However, whenever a planet changes to a new sign or house, that will have a major impact for at least a year either side of the date on which it occurs.

5. When a progressed planet becomes stationary (has no apparent motion with reference to the earth), this has a major influence in the progressed chart.

Note that next to each aspect is the date on which it becomes exact. The influence of the aspect spreads out like waves in a pond on either side of the exact date.

Next to the entry of each planet into a house or sign is an indication of whether that planet is moving forward or backward in the horoscope and how many degrees into the house or sign it has already traveled. The signs of the zodiac are 30 degrees wide, so a planet at 10 degrees would be one third of the way through the sign. The twelve houses of the horoscope vary in width. The report will indicate the width of each house and how far the planet has already traveled into the house.
